SUPERIOR ENGINE FORUMS - *Cleared for a Safe Flight*

Hosted by Bill Ross, A&P I/A

2023 GAA National Aviation

Technician of the Year Award Winner!

MONDAY

10:00am Basic Engine Inspections & Trend Monitoring That Owners Can Perform

This session will explore how prescribed maintenance practices can reduce total engine ownership costs while increasing reliability, durability, and safety.

TUESDAY

8:00am Setting Piston Ring Gap and Cylinder Life

Piston ring gap is critical to the performance and longevity of aircraft cylinders. This session is designed for mechanics and will cover the importance of proper ring gap, common mistakes seen in the field, and the correct procedures for setting ring gap in accordance with manufacturer instructions.

10:00am Engine Leaning Made Simple

Learn insights to make engine leaning simple and understandable. We will discuss lean of peak and rich of peak operations. Also, we will answer the question; "Will I hurt my engine by leaning it aggressively or running lean of peak?"

WEDNESDAY

10:00am Communicating Effectively with your Aircraft Mechanic

This seminar will cover how owners can ask the right questions of their maintenance provider, how to gather and present engine trend data, and how to ensure the right maintenance is done at the right time. We'll also discuss ways to save money while keeping your engine healthy through TBO, and review FAA requirements for keeping your aircraft legal—there's more to it than you might think.

THURSDAY

10:00am Aircraft Engine Compression Testing

This session will debunk common myths and misunderstandings surrounding aircraft engine compression testing. Attendees will see proper compression testing techniques, borescope inspections, and learn how to assess cylinder airworthiness.

FRIDAY

10:00am Engine at or beyond TBO, what should you do?

Perhaps nothing is required. This session will explain the true definition of TBO and the differences between new, rebuilt, overhauled, and repaired aircraft engines. You'll also learn how to work with your mechanic to complete a comprehensive engine health assessment.

SATURDAY

10:00am Basic Engine Inspections and Trend Monitoring That Owners Can Perform

This session will explore how prescribed maintenance practices can reduce total engine ownership costs while increasing reliability, durability, and safety.

GROUNDS ACCESS RULES JULY 17-20

To improve safety, security, and mobility in the final hectic days before AirVenture opening day, these policies and procedures will be in place from Thursday, July 17, through Sunday, July 20. We encourage visitors on the grounds pre-event to make their way to the flightline to watch aircraft arrivals and to remain clear of the exhibit setup areas.

Exhibit Hangars and Aviation Gateway Park Setup Access: Thursday, July 17, through Sunday, July 20, there will be strict enforcement of access to Exhibit Hangars A-D and Aviation Gateway Park. Only credentialed exhibitors and vendors are allowed in these areas during setup hours from 8 a.m. to 6 p.m. on those days. At 6 p.m. sharp, doors in these areas will be locked.

Outdoor Exhibit Setup Access: From Thursday, July 17, through Sunday, July 20, there will be strict enforcement of access to outdoor exhibit areas. Access is limited to credentialed exhibitors and vendors, and only between the hours of 7 a.m. and 8 p.m.

Exhibit Show Hours: Exhibits are not open until Monday, July 21. Visitors on the grounds before that time are asked to give space to allow exhibitors to finish setting up their areas and to exercise caution anywhere around the outdoor exhibit areas due to the presence of equipment used to prepare the areas for the fun hustle and bustle of AirVenture.

GROUNDS ACCESS

Entry will be allowed to credentialed vehicles ONLY through Gate 33 (Waukau Avenue), Gate 37 (Knapp Street/Warbirds), and Gate 26 (Knapp Street/Theater in the Woods). Other vehicle gates will be closed. Noncredentialed vehicles are NOT allowed on the grounds, the same as during AirVenture week. Personal golf carts, scooters, bicycles, and other such vehicles are also prohibited. The restricted area (shown on map) will be enforced to ensure safety for everyone involved as AirVenture preparation is underway.

Exhibitors and vendors within the restricted area will receive special pre-event lanyard credentials. While early AirVenture attendees — such as those arriving with their aircraft — will not require wristbands until Sunday, July 20, they are asked to avoid entering the restricted area. Noncredentialed volunteers will be allowed onto the grounds ONLY to pick up credential packets from their chairmen. EAA security will be present in the restricted area. Noncredentialed vehicles will be asked to leave.

Weather Watch

A watch means that conditions are favorable for severe storm/tornado development.

- Secure items that could be blown away in high winds.
- Be prepared to unplug your electric cord from the electric pedestal.
- If camping by your aircraft, make sure it is tied down securely.

Weather Warning

A warning means that dangerous weather is threatening the area.

Severe Thunderstorm Warning

- Take shelter in your camper or vehicle.
- If a shelter or vehicle is not available, find a low spot away from trees, fences, and poles, but make sure the spot is not prone to flash flooding. If you cannot avoid trees, try to stay close to shorter trees. Cover your head with your hands and lie down on the ground.

Tornado Warning

- Find a ditch, depression, or low area and lie down, covering your head with your hands.
- As a last choice, secure yourself in your vehicle, with the vehicle running so the air bags can be deployed. Keep your head lower than the vehicle windows and covered.

Severe Weather Shelter

- Should a weather emergency occur, anyone seeking shelter can go to the EAA Aviation Museum. If the weather emergency leads to an evacuation of the grounds, buses will transport those seeking shelter from all Red One Markets and Camp Scholler shower houses to the EAA Aviation Museum.

CAMPING GUIDELINES

For the full camping rules and policies, check the camper registration building building or go to EAA.org/CampingGuidelines.

ADA Compliant Facilities

- Accessible restrooms are available at three campground shower facilities (G-15, B-14, and C-18).
- An accessible bus circulates throughout the campground to transport to the AirVenture grounds.
- A select number of ADA accessible campsites are available. Disabled placards must be displayed on camping unit.

All Campsites

- Camping credentials must be visibly displayed at all times on the camping unit and any motor vehicles that will be operated within Camp Scholler.
- Camping credentials are not valid in EAA public parking lots. Additional vehicle and visitor parking passes for the overflow lot (S Lot) may be purchased at Camper Registration. Overnight camping in the overflow lot is not allowed.
- All camping units, vehicles, and other items must be located behind the fire lanes, which are marked with burn lines in the grass or with signage.
- Unless in a Water and Electric campsite and using the one (1) power pedestal, campers are prohibited from plugging into or accessing electricity from any EAA building, facility, power pedestal, or other source to run power to the campsite.
- The number of tents allowed depends on the size of tents. Call EAA in advance if you are considering bringing multiple tents for one campsite.
- Only one travel trailer, camper, or recreational vehicle is allowed per campsite. Vehicles or RVs pulling a trailer are treated as one unit.
- No more than one motor vehicle (or two motorcycles) are allowed per campsite. Unauthorized or additional vehicles will be towed.

- Campsites can be a maximum of 25-by-50 feet. Camping units must be a minimum of 10 feet apart, with a 5-foot perimeter around any camping unit and vehicle.

Generator Campsites

- Except for in specifically designated 24-hour generator use areas, no generators may be operated from 10:30 p.m. to 6:30 a.m.
- Camping units in 24-hour generator areas must be positioned perpendicular to fire lanes.
- No tents or sleeping on the ground are allowed in the 24-hour auxiliary power area.

Campfires & Firewood

The Wisconsin Department of Natural Resources asks that all firewood be left at home and purchased near your campsite location. Firewood should be obtained within 10 miles of where you plan to use it. Fines for transporting firewood across state lines are heavily enforced.

- Firewood is available for purchase at Red One Markets and local convenience stores.
- Only wood should be put in the fire; do not burn garbage or other items. Logs larger than the firepit area should not be burned.
- Campfires should never be left unattended. Do not leave campsite areas without completely extinguishing campfires.

Courtesy & Conduct

- Courtesy quiet time runs from 10:30 p.m. until 6:30 a.m. This includes turning down any loud music and using low voices.
- At no time should activities create a disturbance or interfere with others' enjoyment.
- Please leave campsites the way you found them; clear any garbage and fill any holes.

Vehicles & Personal Transportation

- Unlicensed motorized vehicles are prohibited. Credentials must be obtained and displayed on all vehicles. This includes, without limitation, automobiles, motorbikes, motor scooters, and motorcycles.
- For campers looking to leave Camp Scholler and return, special passes for motorcycles, scooters, and bicycles are available at Camper Registration.

CAMPING

PRESENTED BY

Beechcraft

BY TEXTRON AVIATION

- A valid driver's license is required to operate any licensed vehicle in Camp Scholler.
- Roller-skating/blading, skateboarding, or use of bicycles and self-balancing scooters are permitted in Camp Scholler but not in the AirVenture grounds.
- Single-person electric convenience vehicles and personal disability mobility devices are allowed everywhere when required because of the individual's mobility disability and when operated in a safe manner, consistent with 28 CFR 36.311(b)(1).
- Speed limit is a **maximum of 10 mph** for all vehicles and personal transportation devices. Vehicles must be equipped with lights to be driven at night.
- Cutting through undeveloped areas or empty campsites is strictly prohibited.

Pet Guidelines

AirVenture is not a safe place for animals. If you bring your pet, please follow these guidelines:

- Pets are allowed in Camp Scholler, but they are not allowed in buildings, playgrounds, or picnic shelters. No pets are allowed on the AirVenture convention site, including aircraft camping.
- A maximum of three (3) pets is permitted per campsite.
- Pets must be on a lead, no longer than 8 feet, or otherwise restrained at all times.
- Clean up after your pet and promptly dispose of waste.
- Pets left unattended must be kept in a well-ventilated camping unit. The Winnebago County Sheriff's Office will respond to pets that appear to be in distress.
- Pets found loose will be turned over to the Winnebago County Sheriff's Office or other animal control authority.
- Campers are subject to relocation or expulsion should staff receive complaints due to excessive pet noise, excessive aggression, or any other pet guideline violation.

Prohibited Items & Activities

The following items are strictly prohibited in Camp Scholler and the convention grounds.

- Firearms and other weapons that could be considered dangerous.
- Fireworks and other explosives.
- Flying objects such as RC aircraft, Chinese lanterns, and drones. This does not include Frisbees, footballs, or other sporting equipment.
- Anything that can be considered by law illegal or contraband.

The following behaviors and events are prohibited.

- No one under the age of 21 may consume alcoholic beverages while on EAA property.
- Disorderly conduct, including drunken behavior, will not be tolerated.
- No commercial operations are permitted in Camp Scholler. Noncommercial advertising, demonstrating, and soliciting must be approved in advance by EAA.
- Live entertainment, such as live bands or disc jockeys, are not permitted in Camp Scholler.
- Events that require catering, security, hosted alcohol, and/or invite the general public are not permitted.

AIRCRAFT CAMPING

By default, general camping guidelines should be followed, when applicable.

- Aircraft must be eligible for judging to camp in the showplane camping areas.
- All aircraft must be tied down. "Dog leash" tiedowns are prohibited.
- Only one tent per airplane, unless a second tent is needed for immediate family members, in which case it must fit within the footprint of the aircraft.
- Generators are allowed in the North 40 camping area. Engine-driven generators may not be operated between 10:30 p.m. and 6:30 a.m.
- Aircraft engines may not be started at the campsite. On departure, aircraft must be pushed out of the campsite.
- Coolers must remain secured at your campsite location.
- Alcoholic beverage consumption is prohibited on airport property, except in officially designated areas or under specific permission given by authorized EAA staff.

Two twin-engine turboprop aircraft are shown in flight against a backdrop of a vast mountain range and a winding river. The aircraft in the foreground is a larger model with a dark blue and lime green livery, while the one in the background is a smaller model with a dark blue and red livery. Both aircraft have motion blur on their propellers, suggesting they are moving quickly. The text "FREQUENT FLYERS" is overlaid in large, white, bold, sans-serif letters across the center of the image.

FREQUENT FLYERS

An increasing number of TBM and Kodiak customers are repeat buyers. Such loyalty is earned through the quality, reliability and dedication that Daher Aircraft brings to every airplane we build. Owners buy more than a TBM or Kodiak: they invest in a true partnership based on quality, operational performance, innovation and unmatched customer service.

Fire Prevention

Cooking stoves in transient aircraft camping areas:

- Do not leave campsite areas without completely extinguishing stove.
- No charcoal or wood campfires.
- Careful use of white gas or propane camp stoves is allowed in aircraft camping, provided they are in an area away from parked aircraft and that the stove is attended at all times.
- Cooking stoves must be a safe distance (10 feet) away from any aircraft.
- In the event that the conditions at Wittman Regional Airport and on the EAA grounds change drastically before or during the convention, additional restrictions on cooking stoves may be implemented.

Fueling operations shall be done with the utmost safety in mind, in accordance with NFPA 407.

- Prior to initiation of fueling operations, the fueling vehicle and the aircraft to be fueled shall be bonded.
- No open flame, cooking stoves, or smoking is permitted within 50 feet of fueling areas.
- All fuel spills shall be reported immediately to the Oshkosh Fire Department.
- All fueling hoses shall be properly stowed prior to moving the fueling vehicle.

REFUND PROCEDURES

Refunds are issued as you exit the campground **in your vehicle**.

- Vehicle pass issued with credentials must be surrendered to receive a refund. You will be refunded unused days, less the three-day minimum.
- No refunds are issued on Camp Scholler water and electric campsites.
- Checkout is noon daily. Campers leaving after noon will be charged for that day. There is no grace period.

POWER HOUSE

Okmulgee, Oklahoma may be off the beaten path. But the truth is, our small town is home to the only family-owned Pratt & Whitney Canada Designated Overhaul Facility in the world. Covington Aircraft has the most highly skilled PT6A overhaul, maintenance, and service technicians in the industry – as well as the parts, accessories, rental engines and power sections needed to keep your downtime to a minimum. No one knows the PT6A better, and no one takes greater pride in their workmanship. The personal touch we bring to every customer and every engine, whether it's in our shop or in the field, is what has built our business for over fifty years. It's craftsmanship and compassion you simply won't find anywhere else. Maybe it's just a small-town thing. Come see for yourself the next time you're over this way, and meet the powerful team we've built, and the house we call home.

Wing¹ On-demand drone delivery

Wing is an aviation company that provides drone delivery as a faster, safer, and cleaner way to transport everyday goods. The company has built a small, lightweight, electric aircraft that can deliver food, medicine, and household items directly to homes in minutes. Since 2012, Wing has safely completed more than 450,000 commercial deliveries in North America, Europe, and Australia.

SAFETY Wing has flown more than 450,000+ flights to confirm the safety of our operations — safety is our highest priority.

CONGESTION Drone deliveries can replace some trips to the store, meaning fewer vehicles on the roadways and less traffic on local streets.

PRIVACY There is no live feed of any imagery to anyone, including pilots overseeing operations. Cameras on board are low-resolution.

ECONOMIC Drones can help connect businesses and customers, enabling local shops to expand their footprint for delivery and serve a wider population.

ENVIRONMENTAL When a customer orders a box of pasta from Wing, they use more energy boiling the water than we use delivering the product.

CERTIFIED Wing holds a Part 135 Air Carrier Certificate, which is the same level of certification as many commercial airliners.

SERVICE Customers typically receive their orders in 30 minutes or less.

WHAT TO SEE AND DO

There is so much to see and do at EAA AirVenture Oshkosh 2025 — forums, workshops, air shows, movies, and more. Whether you are here for the day or for the whole week, use this schedule to get the most out of your visit.

NOTE: Check the *AirVenture Today* newspaper, the EAA Events app, or EAA.org/Schedule for schedule changes and updates.

All presentations from Saturday, July 19, to Sunday, July 27, are organized by day and time. Each listing provides the speaker(s), location, and AirVenture grounds map coordinates (see the AirVenture map on pages 68 and 69) to help you find your way.

The Aviator's Decanter Set

1 decanter, 4 glasses

\$175

Runway to Relaxation

After a long day above the clouds, there's nothing like the smooth descent into relaxation. The ***Aviator's Decanter Set*** is designed for those who live to fly and appreciate the finer details when grounded.

Etched with your aircraft's tail number and the sleek silhouette of your aircraft, each glass and decanter tells a story only a pilot knows — a story of altitude, attitude, and arrival.

Whether it's a solo nightcap or a toast with your crew, celebrate every safe landing with a set as personal as your call sign.

Custom-Engraved. Pilot Approved.

WARBIRD RIDES

COMMEMORATIVE
AIR FORCE

AIRBASE GEORGIA

FLY IN THE MIGHTY P-51 MUSTANG

America's iconic WWII fighter and the original aircraft that launched the CAF.

FLY IN THE RENOWNED SBD-5 DAUNTLESS

The "Slow But Deadly" dive bomber that helped turn the tide of World War II at the Battle of Midway. Only a few airworthy examples of the Douglas SBD Dauntless remain.

FLY AEROBATICS IN THE LT-6 MOSQUITO

Strap on your parachute and buckle into the cockpit of our LT-6 Mosquito for an adrenaline-filled flight of a lifetime! You will experience wingovers, loops, barrel rolls, and aileron rolls just like the cadets training for combat in World War II.

Navigate a Rewarding Career Path—

Become an Airline Pilot!

Working as an airline pilot is not only a great way to make a living—it's fun.

This week, talk to members of the Air Line Pilots Association, Int'l (ALPA), who fly for 42 different airlines in the United States and Canada. Come to the Association's booth to watch daily presentations about what it's like to fly as an airline pilot, learn about the resources available (including scholarships), and take the steps to join this gratifying and lucrative profession. We're located at **Booth #329**, just blocks from Boeing Plaza.

#ALPAatOSH25 #ClearedtoDream

Visit **alpa.org/Oshkosh** for a list of daily presentations and other activities. Also, check out ALPA's **clearedtodream.org** for aspiring airline pilots.

Absolute AoA System

For all stages of flight; not just a stall warning

A NewGen solution designed to deliver accurate Angle of Attack (AoA) for all stages of flight. Unlike traditional single-sensor differential pressure systems that are limited to near-stall warning, our multi-sensor advanced normalized pressure ratio system provides reliable AoA for all conditions.

Easy Installation, Advanced Features

- NORSEE approved
- Quick Install with Wifi/BT, no long tubes, less wiring
- Multiple digital display options
- Many AoA presentation styles
- Independent Air-Data system
- Patent Pending

Pilot Chronoscope

You notice our fascination for aviation in each detail of the Pilot. The dial with its large numerals and luminous substance is reminiscent of genuine cockpit instruments.

AVIATION GATEWAY PARK

EDUCATION. NETWORKING. CAREERS.

EAA® AeroEducate™ Center Students K-12

Students can explore exciting career paths in aviation and aerospace through inspiring forums and hands-on activities designed for middle and high school aged youth. Parents and educators can learn more about AeroEducate's free online education program that develops STEM-related skills and builds curiosity and future careers in the world's most exciting industry!

EAA Education and Career Center Post-Secondary Students

The EAA Education Center features colleges, universities, and technical schools that offer programs in aviation and STEM-based curriculum. Students and recent graduates network and interview with a variety of leading aviation companies and organizations with aviation-focused career opportunities.

EAA Career Center

Presented by Piedmont Airlines

There's a place for you in aviation. The jobs are varied and companies need skilled, entry-level, and general laborers. Visit the EAA Career Center to network, meet with company representatives, and learn about the opportunities available. Navigate your way into the exciting aviation industry during AirVenture® 2025!

THE EASY WAY to EAA

ATTENTION, PILOTS!

FLY TO FOND DU LAC

KFLD

Avoid traffic, hassle and expense by flying to Fond du Lac County Airport (KFLD) for an awesome AirVenture experience!

The EAA AirVenture fly-in convention in Oshkosh is a dream destination for many pilots. But flying in to the largest fly-in in the world can be a real challenge. Let Fond du Lac Skyport and EAA Chapter 572 be your easy, affordable landing, camping, refueling and staging area.

- **HARD SURFACE AND GRASS PARKING**
- **CAMP NEAR/UNDER YOUR AIRCRAFT** - showers are available 24 hours a day
- **SHUTTLE SERVICE TO THE EAA GROUNDS**
- **FOND DU LAC** and the Lake Winnebago Region is a remarkable destination!

**ATTENTION,
ROAD TRIPPERS!**

Enjoy all the excitement of the EAA - and the scenic beauty, history & culture, shopping and dining of the Lake Winnebago Region - all in one cool trip!

WIDE SELECTION OF LODGING styles and price points to choose from! A beautifully restored, boutique hotel downtown, as well as Marriot, Hilton, Carlson, and IHG flagged properties.

DOZENS OF DINING OPTIONS from hometown originals to upscale best-in-class: burgers, pizza, lobster, ribeye, potstickers, fresh pasta, crabcakes... it's all here!

BUSTLING DOWNTOWN DISTRICT with a vibrant bar, restaurant, live music, and shopping scene. Shop 'till you drop, then revive with a delicious craft cocktail!

CLEVELAND
WHEEL & BRAKE SYSTEMS

You count on Clevalands' quality wheels and brakes to land safely - every time. Now your aircraft can stand out with **AeroLuxe**. Cleveland Wheel & Brake Systems' **AeroLuxe** wheels and brakes will impress both in the air and on the ground.

- Two-component enamel coating for high performance and extreme temps.
- Resistant to lubricants and oils.
- TSO approved / OEM equipment.
- Wheels and brakes available in 6 colors
Choose a combination to match your style!

Customize to match your style!

In extreme environments where the elements cause faster corrosion you can feel safer with Cleveland's **Obsidian** brake discs. **Obsidian** discs offer corrosion resistance that will extend the life of your brake discs, keeping your brakes healthy and your plane in service instead of in the shop.

- Extended wear life over standard discs.
- Corrosion resistant coating extends the life of your brake.
- Laser etched part number for easy reference and identification.
